## Data RoundUp: March 12, 2013

March 12th, 2013 / Vincent Orleck / 0 comments

SHARE

**Featured in the Data RoundUp this week:**

- Register for our upcoming webinar on Data Center 2.0
- Download our accompanying whitepaper on data center transformation

- Connect with IO on Instagram
- Jump in the wayback machine to view images and video of the original UNIX lab
- The perpetual argument of man vs. machine

**Register for the DCK Data Center Transformation webinar (Data Center Knowledge)** *You're invited to learn more about data center transformation when IO Senior Vice President Aaron Peterson has an in-depth conversation with the Editor-in-Chief of Data Center Knowledge, Rich Miller. The discussion will revolve around the increasing pace of the global demands being placed on data center providers.*

**IO on Instagram (Instagram)** *Follow IO on Instagram.*

**Tech Time Warp of the Week (Wired)** *That iPhone in your hand? You can trace its roots all the way back to the late '60s, when two researchers at the famed Bell Labs built a computer operating system called UNIX.*

**How to Predict the Progress of Technology (MIT News)** *MIT researcher finds Moore's Law and Wright's Law best predict how technology improves.*

**Big Data to Replace Human Instincts? (Silicon Angle)** *Enterprises have always relied on executives with ability to instinctively come up with creative solutions when faced with dilemmas, but we're fast reaching a point where this may not be enough.*

**Data Center 2.0: The Roadmap for Data Center Transformation [whitepaper] (IO)** *CIO organizations that don't focus strategic attention and investment in the data center physical infrastructure are destined to be left behind. The good news is that when it comes to data centers, the future has already arrived—in the form of Data Center 2.0.*

**Data Center Mix (Diane Alber on Paper.li)** *From the creator of the "Kip & Gary" comics series.*
