Business & Decision Selects IO for Data Center Expansion

Phoenix, AZ - October 24, 2012

IO, the leading provider of next-generation modular data center technology and services, announced today that it has been awarded a contract with Business & Decision, North America (EURONEXT: BND), an international Consulting and Systems Integration group.

IO currently provides Business & Decision with Data Center as a Service (DCaaS™) at IO Scottsdale. This contract expands Business & Decision's presence into IO Phoenix in meeting their aggressive growth demands in providing the company with additional data center capacity.

"IO's state-of-the-art data centers and products provide us with the ability to scale rapidly in meeting our client's needs anywhere in the world," said Michael Black, vice president, Managed Services at Business & Decision. "As a strategic partner, IO allows us to provide a total solution to clients in providing a high degree of security and compliance at a physical and logical security layer while providing industry best practices and regulatory compliant Managed Services."

About Business & Decision

Business & Decision (EURONEXT: BND) is an international Consulting and Systems Integration (CSI) company. They contribute to client's success by driving maximum business performance in being an industry leader in Business Intelligence (BI), Customer Relationship Management (CRM), Enterprise Resource Planning (ERP), Life Science (LS), Regulatory Compliance (RC) and a major supplier of services for e-Business and Enterprise Information Management (EIM). Optimization of IT investments through efficiency of operations, quality of service and reduced cost of ownership is delivered to their clients through Business & Decision's Managed Services & Hosting Solutions.

About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
