IO Announces Contract with Binary Pulse, LLC

Phoenix, AZ - November 15, 2011

IO, the leading provider of next-generation **modular data center technology** and services, announced today that it has been awarded a contract with Binary Pulse, LLC, a leader in private cloud and IT solutions for professional services practices.

"Companies with IT infrastructures in a traditional data center are missing an opportunity to create efficiencies that reduce capital and operational costs," stated Brant Roberts, CEO of Binary Pulse. "IO's modular data center platform allows us to only buy what we require to eliminate over provisioning and significantly reduce total cost of ownership."

As part of the agreement, IO will provide Binary Pulse with **Data Center as a Service (DCaaS™)** at **IO Phoenix**, delivered through its modular data center technology platform IO.Anywhere®. Binary Pulse will utilize IO's state-of-the art environment to ensure its professional IT services, private cloud solutions, and physical and virtual hosting services are always available 24x7xForever.

About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
