IO Announces Contract with KnowledgeCentrix

Phoenix, AZ - May 22, 2012

IO, the leading provider of next-generation modular data center technology and services, announced today that they have been awarded a contract with KnowledgeCentrix, a leader in technology solutions.

As part of the agreement, IO will provide current Phoenix-based customer, KnowledgeCentrix, with Data Center as a Service (DCaaS™) delivered out of the IO New Jersey location. This approach provides KnowledgeCentrix a high-performance flexible solution that allows them to scale and expand into modules through its modular data center technology platform IO.Anywhere® in the geographic location that best fits KnowledgeCentrix's requirements.

"I am excited about the opportunity to expand the KnowledgeCentrix services offerings to the east coast," said Chris Andreozzi. "The modular data center approach offered by IO made this expansion both logical and cost effective. The geographic diversity will provide KnowledgeCentrix Private Cloud, Managed Services, and Cloud Backup clients additional redundancy as well as capacity on demand. I am pleased with the current and future partnership with IO."

About KnowledgeCentrix

Our customers tell us that we cure and prevent technology headaches... the big ones and the little ones. How do we consistently do this? We start by employing only those individuals with a passion for ensuring that problems are solved to your satisfaction. We are firmly committed to solving business problems by leveraging the right technology as opposed to being an extension of any one of our key partner's sales team. The net is that the customer's needs are always placed as our first priority.

KnowledgeCentrix managed services enables customers to outsource all or a portion of their technology. This includes private cloud solutions, managed cloud backup, end-user support services and management of on premise infrastructure. Additionally, KnowledgeCentrix is versed in systems and network infrastructure technologies and a number of professional services such as Virtualization and Unified Communication. Since 2002, KnowledgeCentrix has been committed to ensuring that our customer's needs are met. Contact us now to find out how we can craft a solution to solve your problems as well.

About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and

software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
