# IO Announces Contract with Mytek Network Solutions

Phoenix, AZ - February 14, 2012

IO, the leading provider of next-generation **modular data center** technology and services, announced today that they have been awarded a contract with Mytek Network Solutions, a leader in IT support services.

As part of the agreement, IO will provide Mytek with **Data Center as a Service (DCaaS™)** at **IO Phoenix**, delivered through its modular technology platform IO.Anywhere®. This approach provides Mytek Network Solutions the capacity it needs today, along with the ability to quickly scale as required.

"IO's technology provided us with the right geographic solution that can easily scale as our requirements grow," said Brian Blakley, President of Mytek Network Solutions. "Knowing IO is a trusted partner makes them a great choice for us today and tomorrow."

IO.Anywhere technology enables organizations to add data center capacity through a choice of delivery models much faster than traditional data center deployments. These options include Data Center as a Service (DCaaS™) delivered in a range of collocation cabinets, shared and dedicated modules, multi-megawatt, customer-dedicated data centers, and solutions that are rapidly deployed as a product, which allows companies to operate modular data centers anywhere in the world.

For more information on Data Center 2.0 capacity delivered as a service and product, visit [www.io.com](http://www.io.com) or call 480-513-8500

## About Mytek Network Solutions

Mytek provides IT Support Services to clients ranging from municipalities to large enterprises, offering a wide range of services including Managed IT Services, Branded Help Desk Support, and Software Development. Mytek is a reliable partner to organizations throughout Phoenix and across the country, serving clients in various industries, including media, property management, engineering, law, manufacturing, and retail.

## About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
