IO Announces Modular Data Center Contract with ISSQUARED, Inc.

Phoenix, AZ - December 12, 2011

IO, the leading provider of next-generation **modular data center** technology and services, announced today that it has been awarded a contract with ISSQUARED, Inc., a leading information systems management service provider.

As part of the agreement, IO will provide ISSQUARED with **Data Center as a Service (DCaaS™)** at IO Phoenix, delivered through its modular data center technology platform IO.Anywhere®.

"As IT systems and business processes become more complex, IO shares our strong vision to simplify that complexity while increasing resiliency and business performance," said Bala Ramaiah, CEO at ISSQUARED. "IO.Anywhere is so reliable, flexible and efficient, unlike any other provider, IO uses the modular platform internally for its own services business."

ISSQUARED is an information technology start-up firm which seeks to provide complete end-to-end services that integrate Technology & Process Consulting, Service Architecture, Design & Delivery, Support & Business Process Outsourcing with an underlying theme of simplifying complexity.

About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
