## IO Data Centers Offers Clients Europe's Largest Fiber Network

Phoenix, AZ - June 23, 2010

IO Data Centers ("IO"), the leading provider of enterprise colocation and data center solutions, today announced the addition of TeliaSonera International Carrier, a leading global provider of IP, capacity and voice services, to its growing list of carriers available to its data center customers.

TeliaSonera International Carrier owns and operates more than **27,000 miles of fiber network** with over 100 points of presence **in 35 countries across Europe, the US and Asia**. The addition of TeliaSonera International Carrier allows IO to offer new and existing customers increased options including the opportunity to connect directly **to Europe's largest and fastest growing IP backbone**.

"We constantly look for ways to improve and expand the network services we provide," says Kindra Martone, SVP and GM for IO. "The range of carrier options we make available to our customers provides unprecedented flexibility, reliability and cost-savings. With the addition of TeliaSonera International Carrier, we have greatly improved our global network footprint."

IO operates carrier-neutral data centers and provides its customers with direct access to more than a dozen telecommunications carriers including **AT&T, Verizon Business, Level3, AboveNet, AGL, Cogent, Qwest, tw telecom, XO Communications**, and now **TeliaSonera International Carrier**. In addition, IO offers enterprise-grade blended bandwidth and data transport services. The company does not charge for cross-connects and recently announced that it will save its existing customers more than \$25 million over the next three years in cross-connect fees.

"IO's customers have new possibilities to connect to our IP backbone in Phoenix, Arizona. This increased expansion of the US network is strategically important and helps us maintain our position as one of the largest global IP carriers. Moreover, the extended network enhances our service offering to our US based customers." said Paul Dahlgren, Vice President and Head of Product & Business Management, TeliaSonera International Carrier.

TeliaSonera International Carrier delivers IP, capacity and voice services and recently won the 2009 World Communications Awards for Best Wholesale Carrier and Best New Service. The company has a strong history in the US and has been active in the US market since 1995.

### About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center

ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
