IO Data Centers to Present at Gartner Data Center Conference

Phoenix, AZ - December 2, 2009

George Slessman, CEO and founder of IO, a leading provider of enterprise colocation and data center solutions, will present at the Gartner Data Center Conference in Las Vegas on Thursday, December 3. Slessman will discuss "Scale Matters – How economies of scale contribute to a more energy efficient and reliable data center."

IO, recognized for its highly-efficient data centers, utilizes industry-leading best practices and state-of-the-art technologies such as thermal energy storage, variable frequency drives and ultrasonic humidification to reduce operating costs and enhance reliability. IO has seen marked growth in 2009 and recently announced the expansion of its Phoenix ONE data center – one of the most energy efficient data centers in the U.S.

"The Gartner Data Center Conference is one of the key events for the industry," said Jason Ferrara, IO's Director of Marketing. "We're pleased to have the opportunity to participate and look forward to a successful show."

About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
