## IO Opens World's Largest Modular Data Center

Phoenix, AZ - March 23, 2011

*Existing IO Customers Have Already Purchased DCaaS™ Capacity at IO NEW JERSEY*

**IO Data Centers** ("IO"), a leader in digital energy technology, today announced the opening of the world's largest modular data center in Edison, New Jersey, which will be called "**IO NEW JERSEY**". Several enterprise customers have already purchased Data Center as a Service (DCaaS™) capacity at IO NEW JERSEY and additional capacity is available for delivery. IO NEW JERSEY joins **IO PHOENIX** (recently recognized as the seventh largest data center in the world) and **IO SCOTTSDALE** as part of IO's North American data center footprint.

In making the announcement, George D. Slessman, CEO of IO, said, "IO now controls two of the largest data centers in the world and has the ability to deliver Data Center as a Service (DCaaS™) across the entire continent of North America." Slessman added, "We can bring a data center of the magnitude of IO NEW JERSEY online immediately because of our IO.Anywhere™ **modular data center** technology. Today's announcement reinforces why the world's largest enterprises rely on IO for always-on data center solutions."

IO NEW JERSEY is located in an 830,000-square-foot plant previously occupied by The New York Times. The data center is located at Exit 10 of the New Jersey Turnpike and is readily accessible to New York City, Newark Liberty International Airport, all of greater New Jersey, Philadelphia and the mid-Atlantic region. IO NEW JERSEY is located next to one of the largest and most robust power switching stations in the region. The site has in-place fiber optic connectivity from two of the largest IP backbones in the world and IO has commitments from several additional carriers to serve the New Jersey data center.

IO NEW JERSEY, the company's third data center, offers up to 100 MW of UPS capacity or 35,000 cabinet equivalents delivered in colocation cabinets, secure partial modules, dedicated modules and dedicated, multi-module systems. IO provides its **Data Center as a Service (DCaaS™)** offerings to a 100% uptime Service Level Agreement.

"Unlike traditional data center real estate projects that take years to build, IO NEW JERSEY will have capacity available immediately. This is because we manufacture the data center infrastructure at our **factory** and deliver it when customers need it," said Anthony Wanger, IO President.

Information on IO NEW JERSEY data center capacity is available at [www.iodatacenters.com/newjersey](http://www.iodatacenters.com/newjersey) and at 480-513-8530.

### About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
