Kindra Martone Serves as Director of Sales for World Class Data Center

Scottsdale, AZ - December 18, 2008

Kindra Martone Serves As Director Of Sales For World Class Data Center

IO Data Centers, an industry leading colocation provider, announces Kindra Martone will serve as its Director of Sales. Mrs. Martone will develop and manage all aspects of IO's Sales department, including analyzing sales statistics to determine business growth potential and providing leadership to the day-to-day operations of the Sales department, while maintaining focus on the company's strategic goals.

"Kindra is a great addition to the IO Data Centers team", states Anthony Wanger, Founder and President of IO Data Centers. "Her extensive subject knowledge, experience and reputation in the data center industry make her a valuable asset to our company."

Ms. Martone comes to Scottsdale-based IO Data Centers with over 10 years of diverse experience in IT sales most recently from Cisco Systems, Inc. (Cisco) where she was a top Select Account Manager in the Western Region, closing the most strategic sale in 2008. Prior to her time at Cisco, she worked as Channel Business Development Officer for Sterling Network Services (SNS). In her time with SNS, Mrs. Martone created the partner channel program from the ground up, developing strategic relationships with companies such as Avnet, SRP, IBM and Qwest Communications. She successfully closed several million dollars in data center/colocation opportunities with enterprises from around the world.

In her free time, Kindra spends time with her husband and their son. She also is very dedicated to the community and is currently planning a large event with the Phoenix Children's Hospital benefiting children who spend the holiday season in the hospital.

About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
