Phoenix Business Journal Recognizes IO as a "Best Place To Work"

Phoenix, AZ - December 21, 2012

IO, a leading provider of next-generation [modular data center technology and services](#), today announced that it has been named by the *Phoenix Business Journal* as one of the "2012 Best Places to Work." The award is based solely on the results of employee satisfaction surveys, giving prestigious honors to the most outstanding local companies.

The *Phoenix Business Journal* developed an annual list of "Best Places to Work" to recognize the local companies that foster a positive working environment. *The Phoenix Business Journal*, in cooperation with Quantum Workplace, surveyed Valley employees about benefits and perks, corporate culture and more, to determine the "[Best Places to Work](#)."

"As one of the top designers, engineers and deliverers of [Data Center 2.0](#) infrastructure for the world's largest enterprises, governments and service providers, IO does not lose sight of what matters most—our employees," said Craig LeBlanc Senior Vice President of Human Capital. "At IO, we strive to have a culture of innovation and ensure our employees are satisfied in their working environment. If it were not for our visionary and innovative staff, we would not enjoy the growth and success we're experiencing today. We are honored to have made the list for the second consecutive year."

As part of the IO team, employees are with an industry leader that is transforming and re-defining the global data center marketplace. IO's solutions enable organizations to shift from real estate-based data center infrastructure to efficient, sustainable, and software-optimized IO.Anywhere™ modules. This collaborative and creative work environment has contributed to the innovative thinking and willingness to launch and grow IO Data Center 2.0 technology. If you're interested in joining an environment that encourages innovation and initiative, see [Jobs@IO](#).

About IO

IO is a global leader in software-defined data centers and has pioneered the next generation of data center infrastructure technology. IO's integrated hardware and software data center technology platform offers enterprises, governments, and service providers an innovative way to deploy, provision, and optimize data center capacity anywhere in the world. IO technology lowers the total cost of data center ownership compared to traditional data centers, enabling dynamic deployment and intelligent control based on the needs of IT equipment and applications in the data center.
