## IO New Jersey

With its close proximity to Manhattan and the high resiliency of its modular data center infrastructure, IO New Jersey addresses your most critical data center needs when it comes to scalability and disaster recovery.

- **100% Uptime SLA**
- Uptime Institute Tier III Design Certified
- SSAE16 SOC 1 Type II Certified
- No Monthly Recurring Fees for Cross-Connects
- Bring Your Own Carrier (BYOC) – Carrier-Neutral
- Free Remote Hands Support

With IO.Anywhere and IO.OS technology, you'll have **Intelligent Control®** of your hosted data center environment so you can make more informed decisions and maximize uptime.

IO New Jersey is the largest data center available in the New York City metropolitan area. IO New Jersey has been awarded Tier III Certification for Design Documents, for both Phase 1 and Phase 2, from the [Uptime Institute](#).

"In addition to significant cost savings, the technical excellence built into IO's hardware and software platform helps us respond to today's business demands and new challenges the moment they arise."

Jeff Wood, Senior Vice President,  
Information Technology

# Certifications & Compliance

## 100% Uptime Service Level Agreement

IO is committed to attaining the service level objectives required for an always-on data center and offers a 100% uptime service level agreement on critical support infrastructure for customers that opt for a dual-corded environment.

## Power Delivery Network

IO New Jersey has access to a dedicated, onsite sub-station with 30 MVA of core power.

## Network Services

IO New Jersey is a carrier-neutral data center and does not charge a recurring monthly fee for cross connects. IO New Jersey also offers blended Internet bandwidth, IP transport and DNS services.

## Support Services

IO allows you to bring your own managed services provider or choose from a network of IO certified system integration, support, and maintenance partners for installation, preventative maintenance, break/fix, and general support and maintenance services.

IO also offers complimentary remote hands support to save you the time, hassle, and cost of dispatching your own technicians.

## Cyber-Secure

IO employs multiple layers of physical and logical security to protect your mission-critical IT assets.

24x7xForever guard staff, biometric screening, closed-circuit TV surveillance, and customer-defined access controls help to physically secure your data center.

IO.OS® enables real-time monitoring of your data center, from any device, anywhere in the world.
