IO Phoenix

IO Phoenix enables you to securely scale your IT operation from a single cabinet to your own dedicated data center. Take advantage of IO's highly-resilient infrastructure and low-latency network connectivity to deliver an always-on experience for your users.

- **100% Uptime SLA**
- Uptime Institute Tier III Design Certified
- SSAE16 SOC 1 Type II Certified
- No Monthly Recurring Fees for Cross-Connects
- Bring Your Own Carrier (BYOC) – Carrier-Neutral
- Free Remote Hands Support

According to [Data Center Knowledge](#), IO Phoenix is one of the world's largest data centers. IO Phoenix is also one of the only commercially-available data centers to have achieved Tier III Certification for Design Documents from the [Uptime Institute](#).

Certifications & Compliance

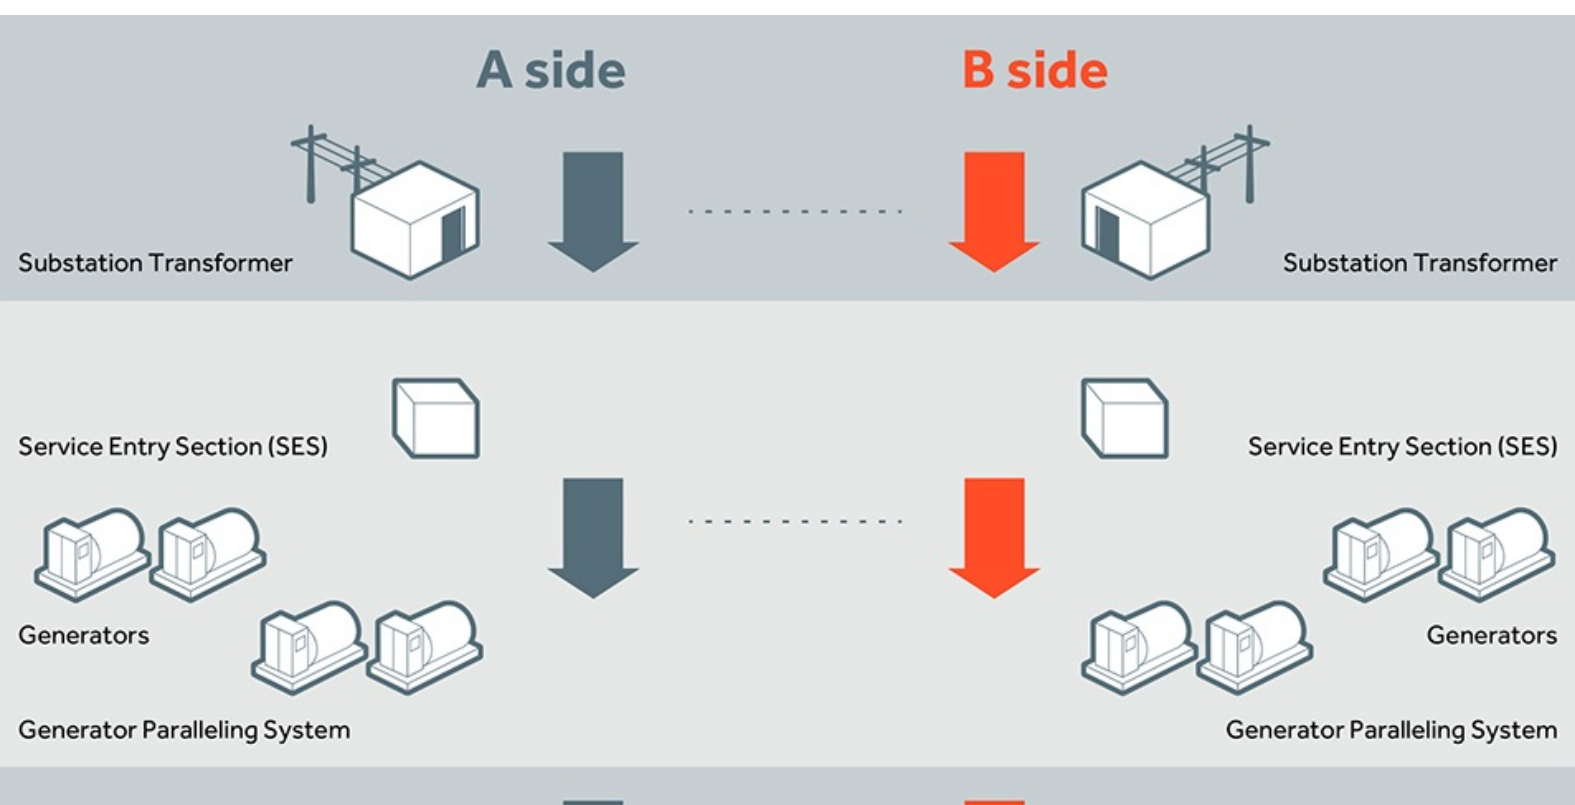

100% Uptime Service Level Agreement

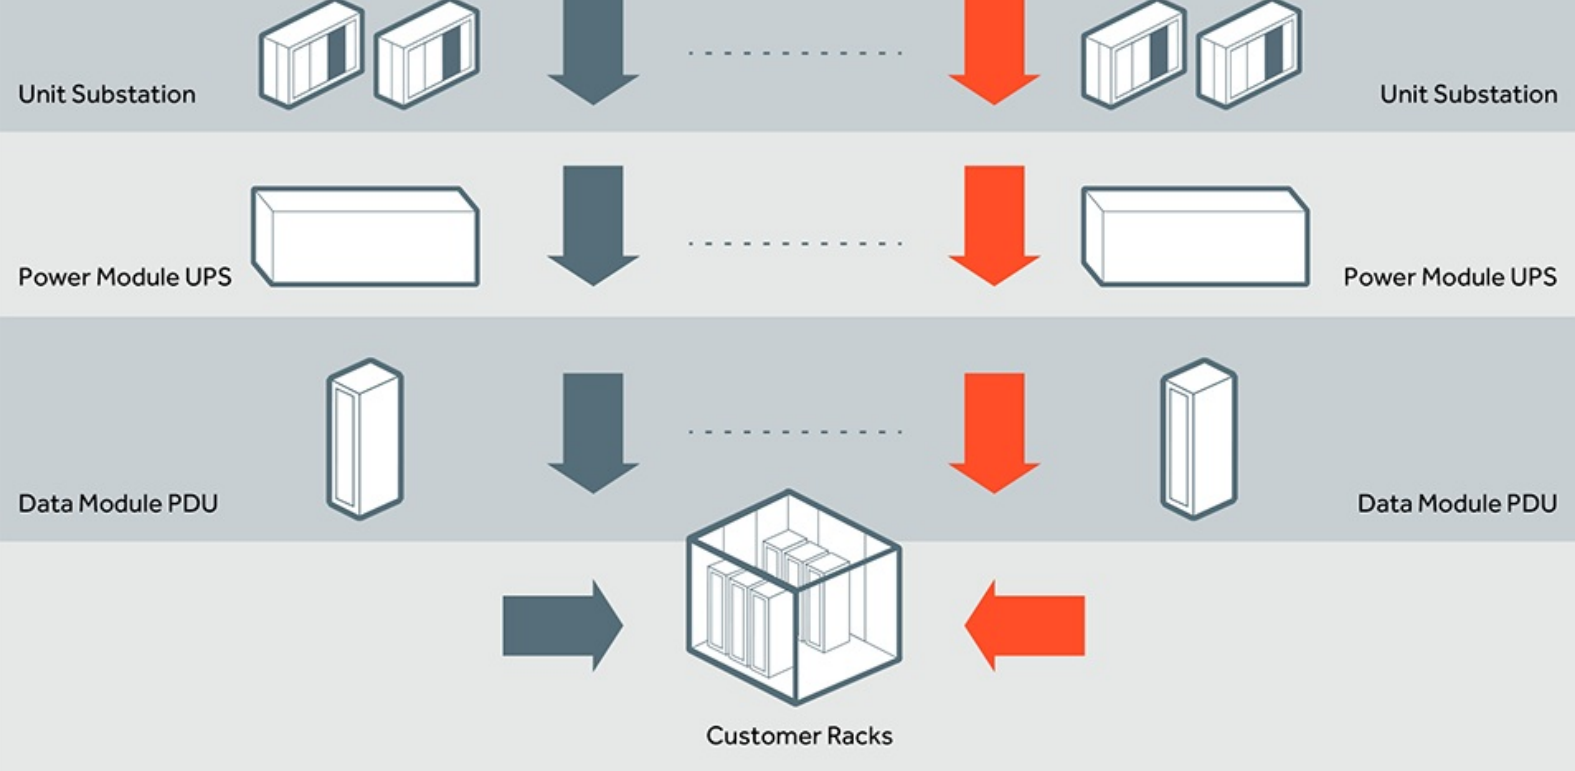

IO is committed to attaining the service level objectives required for an always-on data center and offers a 100% uptime service level agreement on critical support infrastructure for customers that opt for a dual-corded environment.

Power Delivery Network

IO Phoenix has access to a dedicated, onsite sub-station with 40 MVA of core power.

Network Services

IO Phoenix is a carrier-neutral data center and does not charge a recurring monthly fee for cross connects. IO Phoenix also offers blended Internet bandwidth, IP transport and DNS services.

Support Services

IO allows you to bring your own managed services provider or choose from a network of IO certified system integration, support, and maintenance partners for installation, preventative maintenance, break/fix, and general support and maintenance services.

IO also offers complimentary remote hands support to save you the time, hassle, and cost of dispatching your own technicians.

Cyber-Secure

IO employs multiple layers of physical and logical security to protect your mission-critical IT assets.

24x7xForever guard staff, biometric screening, closed-circuit TV surveillance, and customer-defined access controls help to physically secure your data center.

IO.OS® enables real-time monitoring of your data center, from any device, anywhere in the world.
